

QUESTIONNAIRE RE PERCEPTIONS OF CO2 LEVELS IN THE AIR

There is no need for a full **Name**, initials are fine. This is for your reference. **Age** can be estimated to within 5-10 years. For **Sex** just note M or F. For **Occupation**, ask them. In the **Answer** column, note the percentage for **Questions 1, 3 & 4**. and circle Yes or No for **Questions 2, 5 & 6**. For **Q6**, if Yes, note what evidence they give in the Comments column. In **reaction to answers**, it's useful to record if they are shocked, expected that they had been deceived, if they don't believe the facts presented, or other.

The purpose which is to find out what their perceptions are, as gained from the media and government. The survey is better done face to face or over the phone and one person at a time. It cannot be done via email as respondents might try to look up the answers and that would defeat the purpose. Most people find it fun and informative.

Question 1. What percentage of the atmosphere do you think is CO2?

Question 2. Have you ever seen the percentage given in any media?

Question 3. What percentage of the CO2 is man-made?

Question 4. What percentage of the man-made CO2 does Australia produce?

Question 5. Is CO2 is a pollutant?

Question 6. Have you ever seen any evidence that CO2 causes a greenhouse effect?

Person	Age	Sex	Occupation	Question	Answer	Comments
				Q 1	%	
				Q 2	Yes / No	
				Q 3	%	
				Q 4	%	
				Q 5	Yes / No	
				Q 6	Yes / No	
				Reaction to answers
