

Acclaimed climate change 'realist'
Lord Christopher Monckton
is coming to Adelaide soon!

Policy advisor to the Thatcher Government, writer and columnist among other endeavours, Viscount Monckton of Brenchley is the leading international foe of climate change scaremongering and profiteering.

A man of intellect and passion for his cause, he seems to instill fear in the likes of Al Gore, who is yet to accept Lord Monckton's invitation to a public debate.

Come and see Lord Monckton on stage with Adelaide's own Professor Ian Plimer (author of *Heaven + Earth*).

Thursday, 4 February 2010

Lord Monckton on Al Gore and the 'Climategate' scandal

"The fraudsters and racketeers from Al Gore to the people at the University of East Anglia who have been making their fortune at the expense of taxpayers and the little guy [should be criminally charged]".

On the United Nations

"[It exists] only to enrich itself at the expense of the nations it claims to serve, it's time it was brought to an end".

On carbon tax and Prime Minister Kevin Rudd

"Corporations are falling over themselves to cash in on the giant financial fraud against the little guy that carbon taxation and trading have already become in the goody-two-shoes EU – and will become in Australia if you [Mr Rudd] get your way".
