

A CARBON TAX WILL MEAN DARK DAYS FOR AUSTRALIA

The Question is; does the science justify the introduction of a carbon tax?

To answer that question we are organising a visit to Australia by:

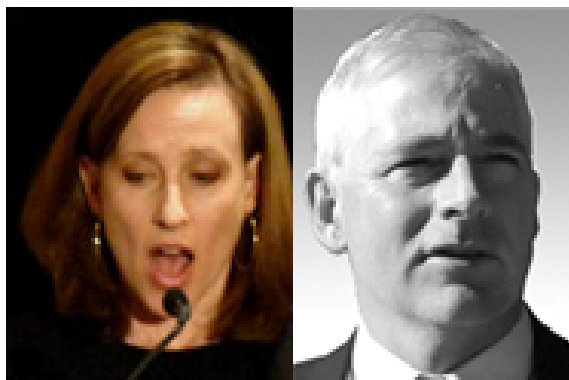

Viscount Christopher Monckton

Christopher Monckton is one of the world's great communicators and is backed by a first rate team of climate scientists.

Professor Ross McKittrick

Professor McKittrick is one of the world's leading economists who specialises in the economics and science of global warming. In 2010 he co-authored a seminal paper refuting one of the principle aspects of global warming.

Jo Nova and Dr David Evans

Jo and David are two of Australia's premier sceptics of global warming. Jo's a prize winning science graduate who's hard hitting science blog reached 2 million hits in 2010, and Dr Evans has six degrees in maths and engineering and designed the carbon accounting models at the Australian Greenhouse Office.

We are looking for sponsorship of this tour, from citizens, both corporate and individuals, who are interested in a transparent debate on the science and a rational approach to Australia's future well being and prosperity. We believe all fair-minded citizens want a better future without having to sacrifice the progress we have made.

You can deposit funds into the following account.

Westpac Bank – Monckton Tour Account

Bank BSB: 035612

Account: 253068

Once we have sufficient funds, the tour details will be booked and publicised
