## **Live Vote flipping in Georgia — sightings of politically biased anti-matter-ballots**

**Another day, another fraud big enough to flip a state outcome**

All it took was a few minutes, and some cheating political positrons sneaking down a wire, and votes were stolen from Trump and added into the Biden tally.

As in the Climate debate — but so much faster — teams of volunteer analysts and experts are growing organically to crunch the numbers and find the fraud. This should all have been done by the DOJ, the FBI or the CIA. Where were they when their country needed them? Just send their salaries to these unpaid analysts instead.

The volunteers analyzed different datasets from Georgia and found at least 3 instances where the Trump voting total went backwards, an impossible act in the known Democratic universe, and the Biden tally went up by the same amount at the same time.

Apparently, in the Georgia ballot collider, clusters of spontaneous anti-Trump-ballots were generated which went on to neutralize real votes by flipping them to highly unstable Biden votes. These ephemeral votes lasted for an illusory moment, just long enough to fool CNN.

Presumably the paper versions of these votes are now locked in warehouses and will soon be meeting their shredder.

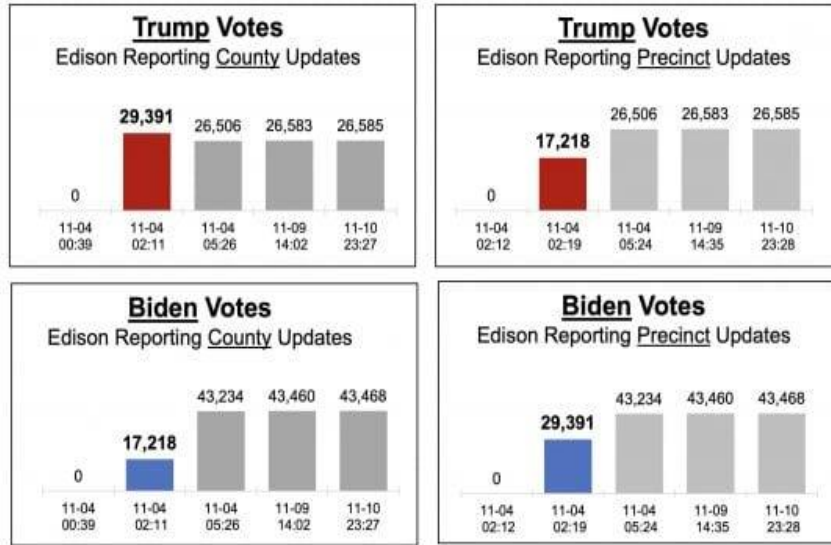

This is from the expert volunteer Data Integrity Group (DIG) which includes at least one of those 400 former Spooks now going rogue by working for free for The President of the United States.

# Georgia Presidential Election

## Bibb County, GA

System identified vote switching between Trump and Biden Absentee counts within Bibb County occurred at timestamp 2020-11-04T02:11:17Z

This mathematical irregularity resulted in a -2,885 decrease for Donald Trump, where absentee vote totals were reported as switched between the two candidates, as Biden received 12,173 of Trump's Absentee votes.

## [GA Hearing: Data Scientists Provide Clear Evidence of Vote Manipulation in 2020 Election](#)

CharlieKirk Staff

The DIG group provides all their data to show their work when they post election videos. So far, no one has debunked their findings.

“As someone who has studied data for many years, I am perplexed that no one else is looking at the numbers to find the answers to this election,” said Mealey. “With so many people making anecdotal comments and conjecture, there is a lot to be gained by looking at the numbers. The numbers are non partisan, have no party alignment, and it’s a universal language. With data we can see the errors, corrections, anomalies, whatever you want to call them — we see that they occurred. We are not here to point fingers, we are just here to explain that it happened, and that voting is an additive process. There should never be negative vote swings, and here we saw them frequently in the data time series affecting President Trump’s votes.”

**Give these people a medal:**

**Lynda McLaughlin** from the Data Integrity Group

**Justin Meale:** nine years in the US Navy as a Electronic Warfare Technician, Cryptologic Technician, and Arabic Linguist. He' s also done CIA work.

**Dave Lobue:** 12 years of number crunching specializing in AI.

**“Based on our findings, Georgia should not have been certified,” said Lobue.**

Somewhere in the US legal system there must be laws someone broke to make this happen. Who will go to jail?
